Notes on gold's annual performance comparison, US data

- Gold topped this US asset performance table 5 times in the last 40 years, behind commercial real estate (REITs) and foreign stock markets (10 times each) and US equities (7x);
- Gold also came bottom 9 times equal to commodities with the worst record of any major asset class;
- Gold's 40-year change (+650% gross of costs) has beaten inflation (298%), housing (498%, excluding costs + yield) and cash (cumulative 482%). Commodities have dropped below end-1975 levels (-3.05%);
- REITs are the best-performing asset both since 1978 (6,227% reported gains before costs) and also so far in the 21st century (up 596% since the end of 1999);
- Gold is the next best performer since 1999 (+327%) and then corporate bonds (190%);
- Gold's worst year was 1981, costing US investors 32%. 2008 was the worst year for REITs (down 37%), US stocks (down 37%) and overseas equities (down 43%);
- Since 1978 gold rose in all 3 years when US stocks lost 10% or more, averaging 9.6% gains. It averaged 11.3% when REITs fell the same, rising on 3 of 5 occasions;
- The US stock market has now risen 9 calendar years running, beating its 1980s' bull run and matching its 1990s' record stretch;
- Cash interest rates have lagged inflation 16 times since 1978, thirteen of them since 2002. Gold rose in all but 3 of those events (2013-2015);
- Gold lagged CPI inflation consistently from 1994-2001. Note that in all of those 8 years cash in the bank beat inflation.
